- User management
- Report handling
- Content moderation
- Analytics dashboard
- Ban/suspend users

UI/UX Requirements

- Facebook inspired clean layout
- Modern glassmorphism + soft shadows
- Smooth animations
- Dark mode + Light mode
- Fully responsive design
- Sidebar navigation
- Sticky top navbar
- Mobile bottom navigation

Security Features

- Rate limiting
- XSS protection
- CSRF protection
- Password hashing with bcrypt
- Secure API validation

Performance Optimization

- Lazy loading
- Image compression
- Caching system

- Optimized API calls
- SEO optimization

Extra Features

- Live streaming support
- Marketplace section
- Saved posts
- Hashtag system
- Poll posts
- Verification badges
- AI content moderation

Database Collections

- Users
- Posts
- Comments
- Messages
- Notifications
- Friend Requests
- Groups
- Stories

Required Pages

- Home Feed
- Login/Register
- Profile Page
- Messenger Page
- Notifications Page
- Friends Page
- Groups Page
- Settings Page
- Admin Panel

Deliverables

- Complete frontend code
- Complete backend API
- Database schema
- Authentication flow
- Responsive UI
- Clean folder structure
- Production-ready architecture
- Deployment guide

Design Instructions

- Blue and white modern theme
- Smooth hover effects
- Professional typography
- Rounded cards and buttons
- High-quality responsive layouts

Important

- Code scalable aur modular hona chahiye.
- Clean reusable components use karo.
- API secure aur optimized honi chahiye.
- UI bilkul modern social media platform jaisi feel deni chahiye.
- Har feature properly functional ho.

Is project ko complete enterprise-level social media platform ki tarah develop karo with professional code quality aur modern architecture.
